

2023 Sewer Fee Calculator

The calculator has two columns you may use depending on whether your NJ American Water bill reads in centum cubic feet (CCF) or 1,000 gallons of water used per billing period. You can only fill in one entry (CCF or 1,000 gallons) for any given month. If you used 10 CCF, enter 10. If you used 7,000 gallons, enter 7. If your property has a private water source (i.e. well water) and you have not installed a water meter, then put 67 in the 1,000 gallons January row and leave the other months blank.
